School Performance Grading Guide

This year's grading guide will not reflect the usual descriptive categories for "Exemplary", "Strong", "Satisfactory", "Low", and "Unacceptable". The district will shift to another grading approach that focuses on growth and which requires prior year and current year data. Given that the district administered two new summative assessments last spring, no prior year data is available to apply this new approach. Below are SY 2014-15 data on student assessment and other school indicators that will be used for next year's growth calculation.
